## Introduction

With the United States government facing continuing deficits and disagreements over the mix of taxes and spending in the budget, it is valuable to consider what the American people think governmental spending priorities should be and how their preferences have changed over the last four decades.

Since 1973 the General Social Surveys (GSSs) conducted by NORC at the University of Chicago have asked people whether government spending in various areas from health to foreign aid is too much, too little, or about right. Table 1 presents the spending preferences of the American public for all areas across all years. (The question wording is given in Table 1 and details on the GSSs appear in the Technical Appendix.) Eleven spending topics have been covered in the 29 GSSs between 1973 and 2014, 20 spending areas from 1984-1998, 21 in 2000, 22 in 2002-2008, and 23 in 2010-2014.

To help distill this crunch of numbers, public support for spending is summarized in net spending scores. Net spending is the % saying that "too little" is being spent minus the % saying "too much" is being spent. For example, in 2014 59.9% said that "too little" was spent on the environment and 10.9% said "too much" was spent for a net spending score of +49.0 (i.e. 59.9% - 10.9 = +49.0 percentage points). If everyone favored more spending for an area, the maximum net spending score would be +100.0 and if everyone wanted less spending, the net spending score would -100.0. Positive scores indicate that more people want to increase spending than to decrease it and negative scores mean that the cutters outnumber the adders.

## Long-term Trends and Current Priorities

Education had generally led spending priorities in recent years, topping the list in 1996-2002 and 2006-2014. In absolute terms support for educational spending has been very high and changed little since 1989 (with net spending scores ranging from +65.8 to +71.5). In 2014, it scored +66.6.<sup>1</sup>

After a first place rank in 2004 with a record high of +72.4, Health finished second in 2006-2008, but slipped to eighth place in 2014 with a score of +40.8. The drop seems to be associated with the passage of the Affordable Care Act in March, 2010.

<sup>1</sup>Table 2 shows the rank and net spending scores for the eleven areas consistently covered from 1973 to 2014, Table 3 shows the same for the areas covered in 1984-2014, and Table 4 for the areas covered in 2002-2014. Rankings in the text reflect Table 4 plus the addition of the Alternative Energy item in 2010-2014.

Now in second place, Halting Crime was the perennial top choice from 1974 to 1988 and even regained first place in 1993 and 1994. But since 1994 net spending dropped from +71.4 to +50.6 in 2002, the lowest support for Halting Crime ever recorded. Its second place finish in 2014 is its best rank since 1996, but its net spending score of +53.1 in 2014 is little different than its score in the last 15 years.

In third place at +51.5, Assistance to the Poor has strongly rebounded from a 10th place showing in 1996. Its 2nd place position in 2010 and 2012 was its top finish ever and it had its best ever net spending score (+63.5) in 2004.

Support for environmental spending rose from +35.8 in 1980 to +70.4 and a first-place rank in 1989. But then backing of the Environment declined to +51.3 and a 7th place position in 1993. Then the Environment nudged upwards in both its net spending score and its relative rank, reaching 4th place in 2006, 2008, and 2014. Its 2014 score of +49.0 is however notably lower than levels in 2006-2008 (+61.9 and +58.7 respectively).

Social Security has gained major ground in the 1990s rising from 10th place in 1993 and 1994 to 9th in 1996, and 4th or 5th position from 1998 to 2014. Its 2014 score of +48.9 is however notably below its levels in 2002-2008 (+55.7 to +60.5).

Dealing with Drug Addiction hit its record high of +66.8 and ranked 2nd in 1988, but slid back to a 7th place position with +57.7 by 1990. In 2014, it ranked in sixth place and its score was at +47.1.

Developing Alternative Energy Sources was added to the list in 2010 and finished fourth in 2010 and 2012. In 2014 it slipped to seventh place and it scored dipped to +46.4. The declining support may reflect the rise in traditional energy sources such as oil and natural gas.

Health fell from second place in 2008 to 8th position in 2014 with its net spending score dropping from +68.1 in 2008 to +40.8 in 2014.

Assistance for Childcare is 9th with a score of +40.7 in 2014. Since first included in 2000, support for more spending for childcare has weakened slightly.

Drug Rehabilitation comes in 10th place in 2014 with a score of +38.3. It rebounded from a drop in both rank and absolute score in 2012. Support for spending on Drug Rehabilitation has almost always been lower than support for Dealing with Drug Addiction.

Law Enforcement is in 11th place with a score of +33.2 in 2014. Support for spending on Law Enforcement has always trailed support for Halting Crime because people are attracted to the results-oriented action promised in the latter case.

In 12th place come Highways and Bridges with a score of +32.7 in 2014. Its 2010-2014 positions are well above its 14th place rank and +16.9 score in 2004.

Supporting Scientific Research is 13th in 2014 with a score of +29.7. Its rank and score have changed little from 2008-2014.

In 14th place in 2014 comes Solving the Problems of Big Cities with a score of +29.5. In both rank and absolute score, support for Solving the Problems of Big Cities is up somewhat from an all-time low in 2010.

Mass Transportation is at 15th place in 2014 with a score of +29.3. While higher than in the early 2000s, support slipped from its all-time best 10th place finish in 2008 with a score of +40.8.

Parks and Recreation is in 16th place with a score of +24.5 in 2014. Support for Parks and Recreation peaked in 2000 and its rank and score have been pretty stable from 2004 to 2014.

In 17th and 18th places in 2014 are two items on government programs for African Americans. Support for Improving the Condition of Blacks is at +17.4 and for the less results-promising Assistance to Blacks support stands at +3.6.

Defense is in 19th place in 2014 with a net spending score of +3.0. While low on the priority list, support rose appreciably from a low of -33.4 in 1993 to a recent high of +12.8 in 2002 in the aftermath of the 9/11 terrorist attacks. The +3.0 score in 2014 was the first time defense was on positive side since 2004, but its rank did not rise in 2014 from its positions in 2010-2012.

In 20th place is Space Exploration with a score of -4.5. It is the first topic on the list to show a negative, net-spending score meaning that more people want to make cuts than to increase funding. Space has always finished close to the bottom, but its -4.5 score in 2014 is the highest it has ever achieved.

In 21st place comes Assistance to Big Cities at -19.1 in 2014. It finishes much worse than Solving the Problems of Big Cities because it does not promise positive results. It has shown little change in its rank or absolute score over the years. It is one of only four areas that has always had negative scores.

Welfare in 22th place in 2014 with a score of -30.8 has regained considerable ground from a near record low of -49.3 in 1994. (Its low point was -49.6 in 1977.) However, support for Welfare did not rise in 2010-2014 despite the economic downturn. Instead support has declined since 2008. Welfare has always been favored much less than Assistance to the Poor. People favor the idea of the government helping those with low-incomes, but many consider Welfare a failed program. Part of the rise in support for Welfare in the late 1990s reflects a positive response to the welfare reforms of the mid-1990s.

In last place in this and every year comes Foreign Aid with a score of -61.7 in 2014. This is up from between -70.1 to -71.5 in the early and mid-1990s, but down from a record high of -52.3 in 2008, leaving it solidly in 23rd place.

## Overall Spending Trends

Support for overall spending (i.e. the average net spending across areas) has always been positive with more people favoring increases than cuts (Table 5). Looking at the 11 items that can be tracked from 1973 to 2014, support declined in the early 1970s to low points in 1976-78 (+11). The public then generally increased its overall support for spending over the next dozen years to highs of +24 to +25 in 1988-90. Then overall spending once again slipped to a moderate level of +16.8 in 1994 before rising again to a near record high of +23.7 in 2006. But it then declined during the recent economic downturn to from +17 to +18 in 2010-2012 before rebounding somewhat to +19.0 in 2014.

Support for domestic social spending (average net spending for Health, Education, Welfare, Solving the Problems of Big Cities, and Improving the Condition of Blacks) has also always been in the pluses. It fell from an early high of +29.2 in 1974 to a low of +13 to +14 in 1977-78. Support then generally moved up to a record high of +39.9 in 1990. Support then slipped to +26.4 in 1994, then rose to +36.7 in 2008 (its second highest). It was notably lower during the economic downturn and still has not regained pre-recession support levels standing at +24.7 in 2014.

## Conclusion

Despite a dislike of taxes (e.g. in 2014, 57.0% said their own federal income tax was too high, 39.0% about right, 1.6% too low, and 2.4% don't know), more people have always favored increases in spending than cuts. In 2014, as in most years since the 1970s, people have backed more spending in about four-fifths of the areas and less spending in only the bottom quintile. Moreover, the number of areas with positive net spending scores not only outnumbered areas with negative scores, but are also larger. In 2014, the largest negative score (-61.7 for Foreign Aid) was bested by the top positive score (Education +66.6) and other top positive scores were well above the other negative scores.

The level of support has however waxed and waned over the decades. Support for both overall spending and domestic social spending declined from the early 1970s to the early 1980s before rebounding to a peak in 1990. Then support again fell off to lows in 1994-1996. After that support again picked up with overall spending peaking in 2006 and domestic social spending topping off in 2008. Both scales fell during the economic downturn. The over-spending score has started to rise again, but support for domestic social spending has not recovered.

Currently Education is clearly the public's top spending priority with a very high score (+67) that is above even other very popular areas like Halting Crime, Assistance to the Poor the Environment, Social Security, Dealing with Drug Addiction, and Alternative Energy (+46 to +53).

**Table 1.** Trends in National Spending Priorities, 1973-2014

We are faced with many problems in this country, none of which can be solved easily or inexpensively. I'm going to name some of these problems, and for each one I'd like you to tell me whether you think we're spending too much money on it, too little money, or about the right amount. First, (READ ITEM A)... are we spending too much, too little, or about the right amount on (ITEM)?

A. Space Exploration Program/Space Exploration <sup>a</sup>
B. Improving and Protecting the Environment/The Environment
C. Improving and Protecting the Nation's Health/Health

1977	+10.9	+13.9
1978	+11.3	+13.3
1980	+17.4	+14.7
1982	+13.8	+20.9
1983	+16.3	+24.1
1984	+19.1	+31.0
1985	+15.5	+23.2
1986	+17.9	+29.4
1987	+20.3	+29.4
1988	+24.4	+35.2
1989	+24.5	+35.2
1990	+24.3	+39.9
1991	+22.9	+36.1
1993	+17.0	+32.0
1994	+16.8	+26.4
1996	+16.9	+27.8
1998	+19.5	+31.1
2000	+23.4	+35.5
2002	+21.5	+32.7
2004	+23.1	+34.9
2006	+23.7	+35.6
2008	+23.0	+36.7
2010	+17.2	+25.9
2012	+17.9	+26.3
2014	+19.0	+24.7

Overall Spending = Average Net Spending for all 11 items

Domestic Welfare Spending = Average Net Spending for 5 items (Improving and Protecting the Nation's Health/Health, Solving the Problems of the Big Cities, Improving the Nation's Education System/Education, Improving the Condition of Blacks, Welfare)

## Technical Appendix

### General Social Surveys (GSSs)

---

The GSSs are conducted by NORC at the University of Chicago. Principal funding comes from the National Science Foundation. Tom W. Smith, Peter V. Marsden, and Michael Hout are the principal investigators. The GSS are full-probability samples of adults living in households in the United States. Interviews are conducted in-person. Sample size across 1973-2012 in the standard cross-sections totals 55,448 respondents (1973=1504, 1974=1484, 1975=1490, 1976=1499, 1977=1530, 1978=1532, 1980=1468, 1982=1506, 1983=1599, 1984=1473, 1985=1534, 1986=1470, 1987=1466, 1988=1481, 1989=1537, 1990=1372, 1991=1517, 1993=1606, 1994=2992, 1996=2904, 1998=2832, 2000=2817; 2002=2765; 2004=2812; 2006=2992; 2008=2023; 2010=2044; 2012=1974; 2014=2538). Full technical details on the sample, response rates, and other methodological matters are presented in Tom W. Smith, Peter V. Marsden, and Michael Hout, General Social Surveys, 1972-2014: Cumulative Codebook. Chicago: NORC, 2015. The data are on-line at <http://www3.norc.org/GSS+Website/>.

### National Spending Priority Items

---

Items covering 11 areas have been asked in every GSS since 1973 (Space Exploration Program, Improving and Protecting the Environment, Improving and Protecting the Nation's Health, Solving the Problems of the Big Cities, Halting the Rising Crime Rate, Dealing with Drug Addiction, Improving the Nation's Education System, Improving the Condition of Blacks, The Military, Armaments, and Defense, Foreign Aid, Welfare). Since 1984 an additional four areas have been included (Highways and Roads, Social Security, Mass Transportation, Parks and Recreation). In 2000 a 16th area (Assistance for Childcare) was added, in 2002 a 17th area (Supporting Scientific Research), and in 2010 an 18th area (Developing Alternative Energy Sources).

Also since 1984, 11 alternative wordings for the original spending items have been asked on a random sub-sample (Space Exploration, The Environment, Health, Assistance to Big Cities, Law Enforcement, Drug Rehabilitation, Education, Assistance to Blacks, National Defense, Assistance to Other Countries, Assistance to the Poor). When the alternative wordings produced distributions that did not significantly differ from the original wordings they have been combined together (Space Exploration Program/Space Exploration, Improving and Protecting the Environment/The Environment, Improving and Protecting the Nation's Health/Health, Improving the Nation's Education System/Education, The Military, Armaments,

and Defense/National Defense, Foreign Aid/Assistance to Other Countries). For the remaining five original spending areas the standard and alternative results are presented separately.

Differences between the standard and alternative wordings are examined in Tom W. Smith, "A Preliminary Analysis of Methodological Experiments in the 1984 GSS," GSS Methodological Report No. 30. Chicago: NORC, 1984; Tom W. Smith, "That Which We Call Welfare by Any Other Name Would Smell Sweeter: An Analysis of the Impact of Question Wording on Response Patterns," Public Opinion Quarterly, 51 (Spring, 1987), 75-83; Kenneth A. Rasinski, "The Effect of Question Wording on Public Support for Government Spending," GSS Methodological Report No. 54. Chicago: NORC, 1988; and Tom W. Smith, "Wording Effects on National Spending Priority Items Across Time, 1973-2004," GSS Methodological Report No. 107. Chicago: NORC, 2006.
